- Founder of <https://nvlan.com.br/comunidade>, (5.7k hits/month) support professionals in the area.
- Speaker at the XII Information Technology Workshop at the Catholic University of Brasília: Topic '*Creation of an Electronic Mail Server with Postfix*'.

PROFISSIONAL EXPERIENCE

Information Technology Coordinator at Confederação Nacional do Transporte **02/2021 – Current**

- Supervision and leadership of service, infrastructure, development, testing and database teams;
- Close collaboration with other teams, for effective integration of IT systems with the company's needs, with active involvement in agile projects, using *backlogs* and *sprints*;
- Planning, definition of quality standards, implementations, acquisitions and maintenance of IT infrastructure;
- Delivery of regular reports to the board, communicating the performance of IT services, project status, purchase requests and suggestions for improvements based on service indicators;
- Cloud migrations (Exchange for Exchange Online, S4B for Teams, files for OneDrive and Sharepoint Online);
- Regularization of corporate backup, implementation of security routines and automation.

Infrastructure Coordinator at União Química – Farmacêutica Nacional SA **08/2020 – 02/2021**

- IT infrastructure manager for 11 units and 6,000 employees;
- Management and monitoring of performance indicators for the team and service quality and SLA;
- Analysis of demand indicators, automating activities that consumed the team, improving the process;
- Expertise in improving services provided, workflows and the IT environment;
- Implementation of new security, monitoring and automation policies and services for the environment;
- Responsible for the acquisition of equipment and services, technology or those involved in it.

Senior-Level Technician IV at SEST SENAT **08/2014 – 08/2020**

- Responsible for managing the datacenter and its IT services at the Headquarters and 150 units (totaling 6,000 users), downsizing and standardizing the environment, thus reallocating part of the team to create the security area;
- Implementation of a monitoring and change management system, increasing the quality of services provided;
- Technical specification for terms of reference and contractual adjustments in educational programs for benefits;
- Administration of all IT infrastructure services, including the adoption of open source solutions;
- 3rd level support for other teams and working with the *ServiceDesk* team, analyzing indicators, automating the most demanded routines, saving time and freeing up staff to perform other tasks.

Infrastructure Coordinator at BBTURISMO **05/2013 – 08/2014**

- Management of the IT infrastructure at Banco do Brasil Tourism Company and its 8 units;
- Reformulation of the environment and infrastructure services to a new, more autonomous topology, with greater control, implementing monitoring, automating tasks and implementing planned changes with less rollback and automating items that required user support. Resulting in the settlement of the team's overtime balance and a 30% reduction in the networks team and 20% in the Helpdesk team;
- Preparation of terms of reference, for purchases of goods and services, under Brazilian law 8,666;
- Regularization of corporate backup.

IT Manager at IMPLANTA INFORMÁTICA **12/2011 – 05/2013**

- Network and support team management, using *Kanban* to distribute activities and dividing projects into *sprints*;
- Responsible for increasing the company's satisfaction, with stable services and an effective team;
- Visits and trips to clients, to support the implementation of the system and network consultancy;
- Standardized installation procedures for the company's system, sold to customers, including a customized operating system, to reduce and standardize incidents, simplifying the service of the Service Desk team.

Infrastructure and Technical Support Coordinator at MDIC **12/2009 – 12/2011**

- Commissioned position, coordinating the Bank, Networks and *Helpdesk* teams;
- Preparation of terms of reference, for purchases of goods and services, under Brazilian law 8,666;
- Management of national projects, such as the development of systems to provide tax benefits to national industry, improvement in the trade balance service and the implementation of the MEI (Individual Microentrepreneur) service;
- Reformulation of the environment, including equipment exchange, updating, monitoring, backup and downsize.

Previous jobs

- Feb. 2002 - Sept. 2009 – Network Analyst, at UCB;
- May 2009 - Dec. 2009 – IT and Prospecting Analyst, at CASSI;
- May 2000 - Apr 2001 – Network Technician at Dataprev.
